Activity #8

UC #1: Prepare a cheat book on different options available to make a Field required in Salesforce. Have simple table with columns like

Feature | Where it is used | Considerations | When to use | Impact on user experience

When field is created | Create field | Field is mandatory for all profiles | When a field is mandatory for all the users | No flexibility

UC #2: Prepare a cheat book on different options available to share a record in Salesforce

UC #3: When an account record is created,
- the system should automatically copy billing address to mailing address
When an account record is updated, specifically any one of the billing address parameters is changed
- the system should automatically copy billing address to mailing address

UC #4: When an account record billing address is updated,
- the system should update all related contract records with the same address
